More Features

Well we have more features,

1. !IMPORTANT! Images will now be resized automatically so you can upload any size and the system will work out the resizing for you.

2. Not uploading images but still asking for people to email or ASK for them will get your advert removed.

3. 13/06/2019 Update to the [rules](#) , please read them, breaking rules can get you banned for a time.

4. New: Scammers category added and in a nice neon pink, use their email and name not yours.

5. Email links are no longer clickable this has been done because the harvesters have found away round it.

6. DO NOT ask for offers or bids as the are trading laws about them and we don't track the offers and got involved in a case a few years back so we do not allow them at all. ONO is allowed because it is based on a price and items. I.E. buying all the item for a lower price.

7. For those who find it hard to read, if you put just 1 in the price field it will ask if you meant to put -1 for the multiple to be shown instead.
